

1. Make buttons on the navbar bigger.
2. Make it so the search bar is there all the time.
3. Add SFSU greeting, like "welcome sfsu students and faculty to From Here to There."
4. Make Login into Login/Registration.
5. Navbar has issues. Something about it being stateless?
6. Make the actual links in the navbar buttons. Like, square around them and stuff.
7. Make the search bar touch.
8. Make the cards on the search page uniform size. Make them all consistent.\*\*\*
9. Lots of white space on the search bar page.
10. Add a "buy now" button to the search bar page listings.
11. Make sure so when you click on something in the search page, it goes to a more detailed page containing info about the item.
12. The way the search page is set up looks messy. Change the way the page looks.

13. Add "message seller button" up above.
14. Sell and Rent buttons? Just have a Sell/Rent button.
15. Make the info on the Sell page change depending on the category.
16. "For box, enter class number" in the description box.
17. Add the navbar to the Sell page.

18. Add a “welcome \*user name\*” to dashboard.
19. Get rid of sort on Listings page.
20. Get rid of green and red buttons on Messages page.
21. Get rid of search on Messages page.
22. Get rid of the switching on the Messages and Compose pages. Just highlight whatever button is clicked.
23. Make sure the highlighted button is obviously highlighted.
24. UX has some work but its doable work.
25. Same navbar, no states.
26. Default to messages.
27. The less pages the better.
28. Home page needs some work too.
29. Make the GitHub commit messages better.
30. Add some header comments to search file.
31. Add inline comments too. Make sure everything is explained.
32. Category in the database should be foreign key.
33. Check architecture slides for making thumbnails from original image.
34. Only maintain one table on the database..?
35. Table of users and password and stuff. Add it.
36. Add a table of messages and stuff. Add it.
37. Checkpoint on database on Saturday. It needs a lot of functionality. Above bullet points.
38. More checkpoint for frontend and backend connectivity.
39. Database check is hella important. It's a security risk if it isn't dealt with.....
40. Maybe drop filters..?
41. Database is hella important!!!!!!!!!!!!
42. Get picture of the homepage.

Summary of Milestone 3 meeting review with Prof. Petkovic and plans for further development

Team number: 03

Meeting date: 24 April 2024 5PM

Summary of feedback on UI (record all pages that need revision):

Summary of feedback on code and architecture:

Summary of feedback on github usage:

Summary of feedback on DB:

Summary of feedback on teamwork and risk management:

Confirm that you have done architecture review to check that developers adhere to MVC pattern, coding style, minimal agreed documentation etc. Record if OK or list the issues found. Request developers follow up on corrections and follow up later by doing code reviews

List below agreed upon P1 list of features for final delivery which constitute product plan. NOTE: after this meeting the team focuses solely on this P1 list of features, e.g. the development is in "feature freeze mode". All listed P1 features (no more no less) MUST be delivered in usable way, free of bugs

Any other comments and issues

Check Point (CP) if given, DUE:

IMPORTANT for selection of P1 features: analyze what needs to be done, prioritize based on two factors: a) importance for the product/user and b) cost/ability to deliver it in given schedule. Based on this come up with the plan (list of P1 features) then execute it. After this the team is in "feature freeze" mode, focus is on P1 features only. Team leads:
